

Press release from Eckelmann AG, Wiesbaden
regarding Chillventa 2018

On the pulse of digitalization

Wiesbaden (Germany), September 28, 2018: Automation and digitalization in refrigeration today and tomorrow: Where are we heading? At the Chillventa 2018 (Hall 5, Booth 110), Eckelmann AG will be showing trend-setting and benefit-oriented solutions with E*LDS. Visitors can look forward to many product innovations. Eckelmann will kick off the first day of the trade fair by announcing an **exclusive Chillventa product premiere**, which future technologies are already using to make inroads into refrigeration technology.

Customers in 27 countries worldwide now rely on E*LDS from Eckelmann as one of the leading control systems for refrigeration systems in industrial and commercial refrigeration. "For more than 20 years, we have been successfully developing electronics and software solutions specifically for refrigeration and building automation," explains Dr. Frank Uhlemann. "With innovative solutions and new technologies, we are continuously opening up new applications for our customers – for safe, efficient and climate-friendly refrigeration technology. At this year's Chillventa, we would therefore like to provide targeted stimulus for further digitization of refrigeration technology and share exclusive insights into our latest innovations."
